

Strategic Planning and Execution. Delivered.

Stratex Solutions brings a level of expertise from many years of experience working with clients of all sizes and sectors.

WHY STRATEX SOLUTIONS

- Strategies need to be sustainable, transparent, and achievable.
- A significant barrier to achieving success is that leaders don't understand how much effort is required to achieve a strategy.
- Few organizations understand how much strategic capacity their organization actually has.
- Most plans lack specific execution, and overcommit the organization's resources. This results in under-delivery of the promises made with the adoption of the strategic plan.
- With Ascend, you make achievable strategic choices and know ahead of time you have the capacity to effectively execute.

STRATEGIC PLANNING

Fully integrated strategic planning system providing full cycle development, maintenance, and governance of organizational strategic plans.

PROJECT EXECUTION

Project management functionality facilitates the ability to actively manage the work on a daily basis. Functionality includes resource allocation, task start and end dates, past due notifications, and other key project execution tasks.

RESOURCE MANAGEMENT

Resources and owners are assigned at the strategy/project and action levels. The system calculates the resources needed to complete the work identified by person, department, dates, and by strategic initiative. Resource impact on the organization is identified to provide "focus" improvement.

STRATEGIC & TACTICAL MEASURES

Strategic and Tactical measures provide the ability to manage the plans and make course adjustments as needed. Features: Strategic Balanced Scorecard and Tactical Dashboard. Examine your results from three viewpoints; external, internal and future view.

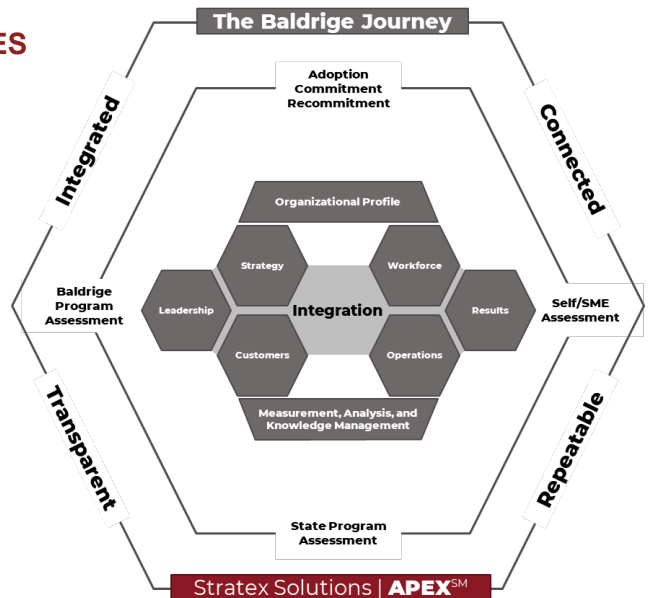

Baldrige Performance Excellence

WHY STRATEX SOLUTIONS FOR YOUR BALDRIGE JOURNEY

- We provide technology-based tools and processes to perform assessments which help organizations determine whether they are developing and deploying sound, balanced and systematic approaches for running their organization.
- Assessments provide a way to evaluate how well an organization is meeting its goals and objectives.
- Organizations use it to evaluate their processes and their impact on results.
- Online Baldrige applications provide streamlined approaches to submitting to state programs for feedback.
